Sangam Chaurasiya

Sr. Python Developer

+91-6306703714 | sangam.chaurasiya0604@gmail.com | LinkedIn

PROFESSIONAL SUMMARY

Experienced Software Developer with proven experience in developing web applications and backend systems using Python and Django. Skilled at writing clear, concise code that is easy to maintain and troubleshoot. Having high capability to led multiple senior class projects to the completion. Able to work independently in office environments or remote locations as needed by the company.

SKILLS

Language & Frameworks	Databases, Tools & Softwares	Hard Skills
• Django • Flask • Fast API • Python • JavaScript	• PostgreSQL • MySQL • Redis • VS Code • PyCharm • Postman • AWS	• API Development • Debugging • Prompt Engineering • Problem Solving • Technical Presentations

WORK EXPERIENCES

MethodHub Software Limited | Sr. Python Developer
Aug 2025 – Present | Mohali, Punjab

- Developed and maintained backend services using **Python and Django**.
- Built and integrated **REST APIs** for communication between services.
- Managed relational data using **PostgreSQL** and worked with **MongoDB** for NoSQL solutions.
- Collaborated with frontend teams to integrate APIs with **React-based applications**.
- Performed **code reviews, debugging, and backend performance optimization**.
- Worked in **Agile environments** to deliver reliable and scalable applications.

Alkye Services Private Limited | Sr. Python Developer
Jan 2025 – Aug 2025 | Mohali, Punjab

- Contributed to the development of a **Retail AI solution** aimed at **profit optimization** by analysing dynamic reports at weekly, monthly, quarterly, and seasonal levels, enabling data-driven decision making for retail businesses.
- Developed and optimized core features using the **Django**, **Python**, **PostgreSQL** and **Redis**, improving response time by **30%**.
- **Improved code quality by 20%** by resolving complexity and addressing major changes in the execution flow.
- **Delivered** technical presentations to the stakeholders, aligning solutions with business goals.

Ciel HR Services Pvt. Ltd. | Software Developer
May 2023 – Sep 2024 | Mumbai, Maharashtra

- **Migrated** the world's **first cloud-based membrane projection software** from a legacy tech stack to **Python and Django.**

- Introduced optimized algorithms that reduced processing time by **40%** and improved application scalability and responsiveness across devices.

Reva Solutions | Software Developer
Jul 2021 – Mar 2023 | Hyderabad, Telangana (WFH)

- Developed the **Rapid Risk Management System**, allowing customers to view notifications and service alerts based on **AI/ML data**.
- Collaborated with data to integrate real-time notifications, providing customers with timely alerts for vehicle maintenance.

EDUCATION

- **Bachelor of Science in Information Technology (IT) –** Himalayan University (2018-2021)
- **Intermediate(12th) –** Saraswati Vidya Mandir Inter College (2018)
- **High School(10th) –** Saraswati Vidya Mandir Inter College (2016)

PERSONAL PROJECTS

1. **Subscription Platform with Django**

   Tech Stack: Python, Django, PostgreSQL, PayPal API, Amazon S3, JavaScript, Bootstrap

   A full-stack SaaS web application that allows users to register, manage accounts, and **subscribe** to premium services using **PayPal**. Built from the ground up to demonstrate real-world **Django architecture** and **third-party integrations**.

   Key Features:

   - **Custom user authentication** with **email verification** & **secure password reset**
   - Subscription management **using PayPal API** (create, cancel, optional update logic)
   - Admin-side **CRUD** for articles and user data
   - **Amazon S3** for scalable media storage

2. **Multi-Vendor Restaurant Marketplace**

   Tech Stack: Python, Django, PostgreSQL, JavaScript, AJAX, Bootstrap, Razorpay, PayPal, Google Maps API

   A full-scale, production-ready web application where multiple vendors can register, list their restaurants, and manage orders, while users can search nearby eateries, place orders, and make payments — all in a dynamic, responsive interface.

   Key Features:

   - **Multi-vendor system** with **vendor approval, dashboards,** and **profile management**
   - **Dynamic location-based search** with **Google Autocomplete** and geolocation to display nearby restaurants
   - **Custom user model** and **email/token-based verification** for secure onboarding
   - **Dynamic modules** for business hours and tax settings per vendor
   - **Payment gateways integration**: Razorpay and PayPal for seamless transactions

LANGUAGES

- **English** (Full Professional Proficiency)
- **Hindi** (Native or Bilingual Proficiency)
